2. TITLE INDEX

(Titles of books reviewed in the Journal given in italics)

Advances in Computers, Volume 21 83
Algorithmic Languages 116-117
Analysis of Pascal Programs, An 81
Application Development Without Programmers 79- 80
Automated Tools for Information Systems Design 79
BASIC Exercises for the IBM Personal Computer 82- 83
Brave New World? 156
Commercial Programming Productivity – An Empirical Look at Intuition 28- 32
Communications Policy for Composite Processes 9- 16
Computer Architecture and Organisation 119
Computer Image: Applications of Computer Graphics, The 40
Computer Networks and Simulation II 157
Computer Productivity 16
Computer Science and Technologies 1982 40
Computers and Industrial Relations: the New Zealand Experience 140-144
Computers in Developing Nations 81
Concurrency Constructs and Module Facilities of CHILL and Ada 17- 27
Control and Audit of Minicomputer Systems 81
Database Management: Theory and Applications 154
Database Schemata, On the Generation of 91-102
Deductive Database Systems, An Introduction to 52- 57
Design of Database Structures 154
Deterministic and Stochastic Scheduling 79
Distributed Data Sharing Systems 115
Document Preparation Systems 120
Environmental Systems Analysis and Management 118
Eurographics 81 82
File Structures and Data Bases for CAD 119-120
Growing Polyhedral Obstacles for Planning Collision-Free Paths 103-111
Hidden Arcs of Interpenetrating and Obscuring Ellipsoids 65- 68
How to Write and Publish Engineering Papers and Reports 83
Image Modeling 16
Implementation of UNSW-PROLOG, The 58- 64
Improving Database Usability and Responsiveness 154
Information Systems Design 82
Information Systems Design Methodologies: A Comparative Review 117
Involving Micros in Education 80- 81
LOFE: A Language for Virtual Relational Data Base 2- 8
Local Computer Networks 115
Local Network Technologies 79
Local Networks for Computer Communications 115
Logic Programming 40
Operating Systems: A Systematic View 83
Probability and Statistics with Reliability, Queueing, and Computer Science Applications 155
PROLOG: A Tutorial Introduction 42- 51
Perhaps Some Enlightenment and Reassurance about our Jobs 122-127
Privacy Legislation and the Right of Access 145-150
Privacy versus Policy, Precedent and Expediency 151-153
Professionalism – Its Educational Aspects 86- 90
Relationship Between Numerical Computation and Programming Languages, The 154-155
Representing Relationships by Automatic Assignment of Colour 160-163
Requirements Engineering Environments 155-156
Scaling Data Arrays, A Simple Technique for 112-114
Structured Design Techniques to Transaction Processing, Application of 69- 75
Structured Systems and Their Performance Improvement Through Vertical Migration 156
Student Selection for Computing Courses 33- 39
Surfaces in Computer Aided Geometric Design 155
Teaching Informatics Courses 118
Tools of the Mind 118
Tradition in Transition: Technological Change and Employment in Australian Trading Banks 128-139
VLSI Electronics 118-119
Visible Execution of Pascal Programs, A System for 76- 77
